Shaun Croft: WebDeveloper

{ scroft@me.com } { (802)304-2113 } { Bristol, VT }

WORK EXPERIENCE

Red Leaf Software   **October 2021- July 2023**
Full Stack Developer   *Remote*
- Developed and supported revenue management web application using Angular 2 with TypeScript and Firebase with cloud functions.
- Developed from ground up front-end of new bartering web site and all interactions using SvelteKit and Typescript.
- Created new components to implement into the system based on the clients specifications and modified existing components where needed while following the correct coding practices and protocols.
- Communicated with clients on a twice-weekly basis to review progress and preview the coming changes to the web application.
- Received and analyzed bug reports, performed necessary troubleshooting, and implemented bug fixes.

Seegle LLC   **June 2021 - Present**
CTO/Lead Developer   *Remote*
- Created video-calling mobile app from idea to fruition, while forming LLC and navigating the process of publishing an app to both Google Play Store and Apple App Store.
- The front-end built with the Dart programming language and the Flutter SDK.
- The backend uses combination of Firebase for authentication, database management, cloud functions, messaging and analytics, and uses Agora for a video routing and recording capabilities.
- Created all assets to include custom icons, logos, and all App Store/Play Store screenshots/assets with a combination of Gimp, Canva and inVision Studio.

PsychedelicExperience.net   **March 2021 – October 2021**
FrontEnd Developer   *Remote*
- PsychedelicExperience.net is a registered non-profit building the worlds most comprehensive directory of counselors and therapists using psychedelics as a therapy tool.
- As lead front-end developer, I oversee the implementation of the teams design objectives to ensure an enjoyable and hassle-free experience.
    - We have seen an increase of new users by 25%, as well as maintaining over 3000 regular users and growing.
    - Helped oversee the re-release of our updated website.
- Helped transition from WordPress to React, while still using the WordPress API as a headless CMS.
- Built using the ReactJS library, as well as Material-UI.
- Maintain contact and code with the team through GitHub and hosted using the AWS EC2.
